

Datasheet

Waterproof Epoxy Bodied Platinum Redox Electrode with ATC Jenway Part Number 924 054

This electrode is designed for standard ORP measurements of general solutions. It is suitable for general purpose measurements and accurate Q.C. and research work.

Specifications:

| Parameter | Specification |
|-------------------|----------------------------------------|
| Type | Combination |
| Sealed/Refillable | Refillable |
| Refill Solution | 4M KCl/AgCl partial gel (025 197) |
| End Type | Platinum (with protective cover) |
| mV Range | 0-1000mV |
| Temperature Range | 0-80 °C |
| Reference Type | Ag/AgCl |
| Body Material | Epoxy |
| Dimensions | 120x12mm |
| Cable Length | 1 metre (nominal) |
| Termination | 3150/3205 Waterproof Connector (5 Pin) |
